

The chart displays the distribution of silhouette coefficients for 16 clusters. The x-axis, labeled 'Coeficiente de Silueta', ranges from -0.75 to 1.00. The y-axis lists clusters from 0 to 15. Cluster 0 (blue) is the largest and shows a broad distribution from -0.8 to 0.0. Clusters 1-15 are smaller and show varying degrees of overlap between negative and positive silhouette values, with some clusters like 15 having very high positive values.
